🟦 3. ISOMERISM (ADVANCED LEVEL)

1. Geometrical (E-Z system)

Rule:

CIP priority assign karo

Same side → Z

Opposite → E

2. Optical Isomerism (FULL DEPTH)

Chirality Condition:

4 different groups

No plane of symmetry

3. R/S Configuration (ADV RULE)

Steps:

Priority assign (atomic number)

Lowest group back side

Clockwise → R

Anticlockwise → S

4. Meso Compounds

Edit with WPS Office

Chiral centers present

But overall achiral (plane of symmetry)

5. Racemic Mixture

Equal d + l

Optically inactive

Edit with WPS Office
